

ActiSaf^{Sc 47}

FOR DAIRY COWS

ACTISAF SC 47 IMPROVES INTAKES, REDUCES ACIDOSIS AND INCREASES MILK YIELD BY UP TO 3 LITRES PER DAY. AN ACTISAF COW IS A MORE PRODUCTIVE COW!

Actisaf Sc 47 is the market leader in protected live yeast.

The unique manufacturing process used to produce the granules ensures that the live yeast core is protected from heat and moisture by a layer of dead yeast cells.

Only Actisaf Sc 47 has this stability, which means that more yeast cells reach the rumen alive, making Actisaf Sc 47 the most cost effective live yeast available.

How does it work?

Actisaf Sc 47:

- Stabilises rumen pH by reducing the build up of lactic acid, which causes acidosis
- Increases VFA (energy) production and microbial protein synthesis, which both increase milk and milk protein yield

- Reduces rumen oxygen content and stimulates the growth of rumen organisms that digest fibre and starch, thus increasing feed intake and helping efficient digestion

What are the benefits of using Actisaf Sc 47?

- Increased milk yield
 - Yield increases of up to 3 litres/cow/day
 - Higher, earlier lactation peaks
 - Yields maintained for longer
- Milk protein increases of up to 4.3% and butterfat increases of up to 9.8%

Milk price (ppl)	Benefit from feeding Actisaf (£/cow/year)
23ppl	£48
26ppl	£57
30ppl	£69
34ppl	£81

- Increased Dry Matter Intakes (DMIs)
- Reduced incidences of acidosis, lameness and cud balls and more contented animals
- Reduction in the variability of performance where there are changes in forage or other dietary raw materials
- Easier transition for stock between various stages of production such as the change from dry to lactating cow

Overall, Actisaf Sc 47 creates a more efficient rumen, which promotes higher intake and better feed utilisation, ultimately leading to more productive and contented animals.

How do I use Actisaf Sc 47?

Actisaf is heat stable and can be included in compounds, blends and home mixed diets.

Warehouse:

Unit 1 Doagh Business Park
11 Kilbride Road
Doagh.
Co Antrim, BT39 0QA
